1. The following is an examiner's statement of reasons for allowance: None of the prior art of record either alone or in combination discloses the combination in the independent claims:

Regarding claim 1, a fiber channel in each substrate **extending from the front to rear faces** and a groove along the longitudinal axis of the front face. A friction-reducing element in these grooves where one of the substrates translates with respect to the other substrate **along the longitudinal axis of the grooves**.

Regarding claim 38, a fiber in a first array is **movable into and out of optical communication with a selected fiber of a second array to effect switching**.

In addition, the examiner would like to point out that most of the spheres identified in the best prior art are not friction reducing elements but lenses.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
